

6th: Coordinate Geo
Geometry

ESSENTIAL QUESTION:

What are some geometric terms I will need for this unit?

QUESTIONS:

Write at least 3 questions about what is unclear or what could possibly be on a test or quiz?

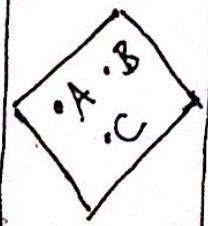

NOTES:

Term	Diagram	Notation	Definition
Point		P (any capital letter can represent a point.)	location with zero dimension
line		\overleftrightarrow{AB}	Straight and extends to infinity in both directions.
ray		\overrightarrow{CD}	portion of a line starting at one point and extending to infinity in one direction

SUMMARY:

QUESTIONS:

NOTES:

Term	Diagram	Notation	Definition
Segment		\overline{EF}	portion of a line joining two points
Endpoint		E and F are endpoints of \overline{EF}	point at each end of a segment
plane		plane ABC	flat surface with zero thickness that extends to infinity in two dimensions. (like the X-Y plane)

SUMMARY:
